IntelaTrac[®] Implementation Support

SAT IntelaTrac[®] is a proven product yielding dramatic improvements in maintenance costs, equipment reliability, and increased unit throughput. Additional benefits are obtained in Safety and Environmental Performance.

Implementation can be faster and better, at lower cost, with less resource, by using Best Practices and Implementation Templates. Your project can benefit from the hard-learned lessons from previous projects.

BEST PRACTICES AND IMPLEMENTATION TEMPLATES

FAST

Rather than starting from scratch, start with our templates. Adapt them for any special needs at your plant. 90% will work as they are.

GOOD

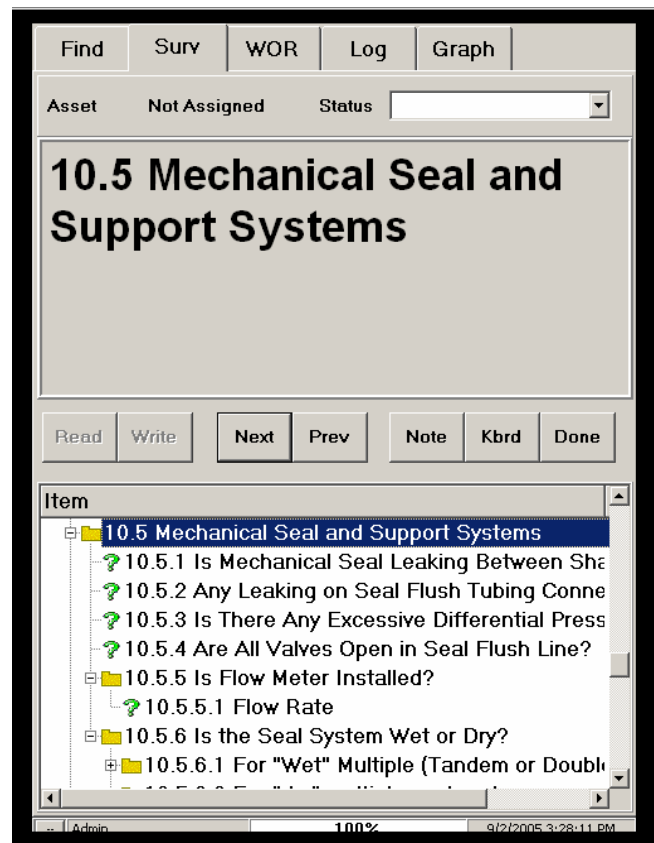

Best Practices of IntelaTrac[®] implementation are embedded in our Best Practice Rounds, Tasks, and Templates.

COST EFFECTIVE

Substantially reduced local resource by use of templates and drag and drop.

BEST PRACTICE ROUNDS AND PERIODIC TASKS

Proven round items, periodic tasks, and IntelTrac[®] templates that speed deployment and improve implementation quality. Includes 290 checksheets for 38 equipment and process categories.

IntelTrac[®] PROJECT DEFINITION WORKSHOP

This one-week workshop defines the specifics of an IntelTrac[®] project:

- Business and Operational Objectives
- Project Scope Definition
- Economic and Intangible Benefits
- Establishing Baseline
- Resource Requirement
- Project Timing and Duration
- Project Cost
- Return on Investment
- Measuring Project Benefit

PROJECT PLAN DEVELOPMENT WORKSHOP

This one-week workshop builds a detailed item by item plan and timeline for the IntelTrac[®] project.

PROJECT MANAGEMENT SUPPORT

We provide certified project management support throughout a project:

- Project initiation – Project Charter and Scope Statement
- Project Planning – Schedule, Cost, Risk Management Plan, and Communication Planning.
- Execution – Quality Assurance and Information Distribution
- Monitor and Control
 - Scope Control
 - Risk Monitoring, and Management
 - Performance Reporting
 - Project Closure

PROJECT PLAN REVIEW

This workshop is for companies or sites that have already defined their IntelTrac project and project plan and want it reviewed and compared to other successful projects.

IntelTrac[®] CONFIGURATION WORKSHOP

This is a one-week workshop using the **BEST PRACTICE ROUNDS AND PERIODIC TASKS** to actually configure IntelTrac[®] for the specific plant. Starting from equipment and process list using our templates in Excel the client will have rounds ready to deploy the following week.

POST IMPLEMENTATION REVIEW

This is a one-week workshop to conduct a “Lookback” on a project to determine the project benefits and lessons learned for future implementations.
